Lead Data Analyst • Power BI & Analytics

Q1 Performance & Rider Profile Snapshot

TOTAL Q1 TRIP VOLUME

791,956

Overall Dataset Analysis

ANNUAL MEMBER SHARE

91.0%

720,313 Commuter Trips

CASUAL RIDER SHARE

9.0%

71,643 Leisure Trips

Annual Member Behavior

Routine weekday commuters with predictable 13-minute transit times.

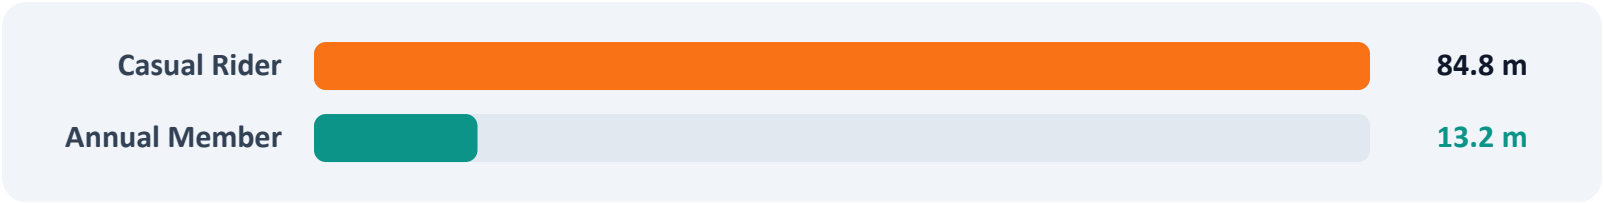

Casual Rider Opportunity

Weekend leisure cyclists riding 6x longer with high conversion potential.

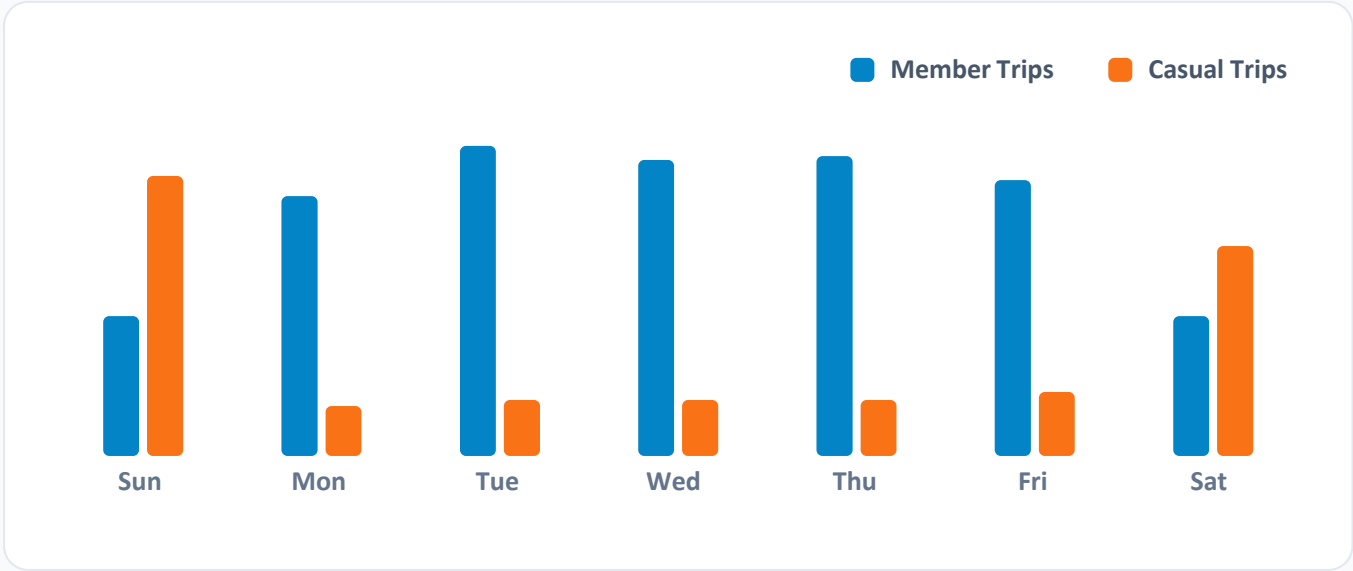

Casual Riders Stay on Docks 6x Longer

84.8 min

Average Casual Ride Duration vs. 13.2 min for Annual Members

Commuters Own Weekdays; Casuals Peak Weekends

Weekday Commute Engine

Members average 110k–135k daily trips during work hours.

Weekend Surge Peak

Casual riders increase trip volume by over 200% on weekends.

Three High-Impact Conversion Strategies

Targeted Weekend Campaigns

Focus digital promotions near parks and waterfront routes during weekend peak hours.

In-App Savings Calculator

Trigger automated post-ride alerts highlighting exact cost savings under annual plans.

Flexible Pass Credits

Credit weekend single-pass fees toward annual pass upgrades within 30 days.

Four-Phase Implementation Strategy

1

Q1 Analytics Sign-Off

Finalize Q1 baseline metrics and stakeholder agreement.

2

Q2 App Notification Build

Deploy post-ride savings calculator alerts in mobile app.

3

Q3 Weekend Campaigns

Launch geo-targeted summer marketing at popular waterfront hubs.

4

Q4 Conversion Audit

Evaluate annual membership growth and revenue uplift.

EXPANSION HORIZONS

Expanding Scope for 12-Month Impact

1

Full 12-Month Seasonality Modeling

Incorporate summer and autumn peak datasets to refine annual projections.

2

Demographic & Route Analysis

Integrate start/end station GPS data to identify top conversion corridors.

3

Price Elasticity Testing

Test promotional membership discounts to find optimal price sensitivity.

CYCLISTIC BIKE-SHARE

Thank You & Strategic Q&A

Ready to execute data-driven campaigns to accelerate annual membership growth.
